

KerbDrain

Queen Victoria Street, Fremantle, WA

Queen Victoria Street is the main route into Fremantle City from Perth and caters for heavy vehicles from the Fremantle Port. Recent resurfacing created ponding during heavy rainfall and ACO's KerbDrain provided the solution.

Project Design Brief

- To minimise excessive ponding during heavy rainfall events

ACO's Solution

- Provide a barrier surface drainage system

Benefits

- KerbDrain intercepts and captures sheet water flowing across the road
- KerbDrain is installed with a minimum of excavation, reducing road closure time

Other ACO Products Installed

- Plastic cable pits
- PowerLok® lids

PFW201541
